

# PIX Pellet Continental Index

## PIX Pellet Continental In Brief

- PIX Pellet Continental Index is a wood pellet price index concentrating on medium-scale use (e.g. small power plants, hotels, greenhouses) of pellets in Germany and Austria
- Published since December 2011
- Index is calculated from prices of actual trades
- Publishing 1st Tuesday of the following month at 12 noon Helsinki time, GMT +2 (following day if public holiday)
- The index is published in EUR per metric ton, prices are reported per metric ton.
- More detailed specifications can be requested from FOEX Indexes Ltd.

## Main Uses of PIX Indices

- Possibility to hedge - through an exchange or bank/other financial institution - product or raw material price risk against a reliable index
- Basis for a price formation directly with a customer/supplier
- Basis for internal pricing/invoicing between profit centers (e.g. pulp mill to paper mill, liner board mill to box plant, wood to energy)
- Market research needs
- Useful reference tool, based on industry information, yet transparent and objective
- Source of up-to-date market information
- Any commercial use of PIX indices requires a license agreement with FOEX, the owner of the PIX trademark
